

Alana Fairchild's SOUL GUIDANCE & SACRED MENTORING™

Student Guide 2020

We want you to have an amazing year with us. We believe in what is possible for you this year and it's such a special gift for yourself and for those that are going to benefit from your increasing spiritual empowerment personally and professionally. We believe that there are simple ways that you can ensure that you get through this year feeling more empowered, vital, inspired and ready to take on the world (with love) than ever before.

Here are our suggestions for you to be able to get the most out of the training program and yourself.

Take care of yourself

This is a full, deep and powerful program. It has been created to elicit real changes in you and your life. You'll need to give yourself time to take it in.

Rest regularly. This can be easier said than done and it often requires that you 'book it in your diary' if you have a very busy schedule. Even a 30 minute stroll in nature once or twice a week, where you don't think too much about anything, might be all that you need to stay well and not become overwhelmed. Or maybe your rest needs to be physical, in darkness, with just a candle and soothing music. Tune in to what *you* need and give that to yourself on a regular basis.

Eat properly, exercise and be hydrated. Listen to your body and take as best care of your health as you can. It might seem unexpected to say this in a program that is for energy work but you'll come to realise that genuine spiritual work is actually quite hard on the body at times. You are pushing energy through your nervous system. It's very real. Give yourself time to adjust to what you are doing, just like you would if you were training your physical body to grow fitter through exercise.

Good nutrition, rest and physical activity that feels right for you will all help you recover from your energy work done in the training program and your spiritual growth and energetic empowerment will be enhanced as a result.

Additional Mentoring

Book additional mentoring if you need it to handle what is coming up for you during the training. It is a way to take care of your personal wellbeing and get the most out of your program. Care enough for yourself to meet your needs and allow yourself to be helped.

If you are going to grow a lot during the year, and we believe that you have that capacity within you, then issues will arise from time to time. It's not always comfortable but it's better to work through them and enjoy increased freedom and happiness than to avoid facing what is happening for you. We encourage you to treat yourself as your best investment. We believe that will only make you a better healing professional and an even happier person.

Please refer to our additional mentoring document if you feel you need it. Or perhaps you already have a mentor that you work with and you feel can support you on the program. Having additional mentoring based on your needs will help you make the most of this year of training.

Pace your learning

If your throat chakra wasn't strong before the course, it will very likely become so during it! The throat chakra helps us set schedules, make priorities and plans, and stick to them. If you schedule time for study and break time, you'll find it easier to manage your studies, stay on top of your assessments and enjoy the program, without becoming overwhelmed.

We suggest that you look to schedule around six hours of study time a week. You may like to break this up into three lots of two hours. Twice during the week, and once on a weekend, for example. These study hours will include time to read through the materials, listen to the MP3s, watch the videos and write in your journal. It includes time to run through the templates and do exercises in the related book for your module. It also includes time to work on your assessment due at the end of the training.

We may ask to see your journal at some stages during the training if we feel this is helpful, so please keep on top of it regularly. You don't have to write pages and pages - although if some of you are like Alana you probably will (!) - but at least one or two pages a fortnight is suggested as a guideline to keep your journal flowing. There is a separate PDF called Questions to Support your Journalling which will help inspire your journalling if you get stuck or blocked.

We want to see you emerge from the end of this training as an even more deeply empowered, successful and inspired light in this world. To do that, you need practical pacing techniques. This means not getting overwhelmed or behind on your work - or too far ahead of yourself where your body may need time to catch up with your enthusiastic mind - by working to a schedule as much as you can.

To help you manage the course load, we have created a suggested (and detailed!) study guide. This is our way of helping you get started with time management, but you'll be responsible for working out what approach to the work suits you and your schedule.

We don't recommend leaving things until the last moment, though we do understand how that can happen sometimes. We know that some of you will be 'crammers' and used to doing things at the last minute, but this is a big course. If you can learn to pace yourself, and work steadily, you really will make incredible gains through the year with us.

We have a week-to-week suggested study guide for you below. You can adapt it to your own needs and habits, but it gives you an idea of how you might start to plan, so that you can stay on top of your studies and pace your learning steadily for great results. You'll enjoy your year more with us and find that planning helps make the training much more manageable.
